ABDULLAH FOUZE

Senior Projects & Facilities Leader | Capital Projects | Maintenance
Operations | Multi-Site Portfolios

Senior projects, facilities, and engineering leader with 14+ years directing multi-site maintenance operations, retail expansion, construction, fit-out, renovation, MEP systems, and technical teams across Saudi Arabia. Currently lead projects and maintenance across 170+ live retail sites for Dukan Retailing Company, delivering 81 store openings across FY24 and FY25 at 96%+ on-schedule delivery and 9% budget savings, and designed and deployed a custom CAFM platform that lifted preventive-maintenance compliance from 85% to 99%.

DUKAN RETAILING COMPANY

Jeddah, Saudi Arabia · Multi-City Retail Portfolio

Head of Projects & Maintenance

JANUARY 2025 TO PRESENT

- Lead facilities expansion, construction/fit-out delivery, and maintenance operations across **170+ live, operating retail sites** in Jeddah, Makkah, Madinah, Taif, and Yanbu.
- Report directly to the CEO; lead annual budgeting, resource planning, KPI setting, and performance management for projects and maintenance.
- Lead a 21-person projects and maintenance team spanning a Maintenance Manager, refrigeration, HVAC, electrical, and civil technicians, a Site Engineer, a Designer, and a Coordinator/Document Controller.
- Manage an annual project portfolio of approximately **SR 38M**, with up to eight projects running concurrently.
- Standardized construction delivery through fixed-price contractor framework agreements — pre-agreeing scopes, commercial terms, and contractor readiness ahead of each fiscal year — cutting cost variance by roughly **8%** and eliminating the previous five-day procurement cycle.
- Directly manage six external maintenance contractors and service providers; recruit site engineers, project coordinators, and technicians; restructure teams for coverage, compliance, and performance.
- Delivered a **16,000 sqm distribution center renovation** on time and within budget.
- Designed and built a custom CAFM platform myself using AI-assisted development, despite having no formal coding background, lifting preventive-maintenance compliance from **85% to 99%**, cutting average work-order closure time from four days to two, and raising overall maintenance performance from **80% to 85%** and climbing.
- In FY25, delivered **29 new store openings** at **97% on-schedule delivery** and **9% savings** against the overall budget.
- Right now that means actively running a live AC & refrigeration preventive-maintenance cycle across 170+ stores and the distribution center (91 in Jeddah, 42 in Makkah, 22 in Madinah, 12 in Taif, 7 in Yanbu), alongside municipal (Baladiya) compliance tracking across the whole portfolio.

DEC 2023 TO JAN 2025

Project Manager

- Managed the full retail project lifecycle across multiple sites and cities: site receiving, budget approvals, documentation, tendering, contractor selection, execution, handover, and closeout.
- Reported to the VP of Projects & Development, managing an **SR 30M+ annual expansion budget** across the western region.
- Delivered **52 new store openings in FY24**, achieving **96% on-schedule delivery** and **9% savings** against the overall budget.
- Cut fit-out duration by more than half, from 25 days down to 12, while standardizing store look and feel, quality, handover, and readiness.

►► **FLAGSHIP PROJECT**

ABDULLAH AL OTHAIM MARKETS

Riyadh, Saudi Arabia

Senior Project Manager, Renovations

- Owned the **SR 47M+ Othaim Corporate Mall / Head Office** project end-to-end, from scope definition, budgeting, and planning through design coordination, contractor selection, and execution to completion.
- Coordinated architects, designers, consultants, and contractors across an **18,000 sqm head office**, **4,000 sqm of rental offices**, and **10,000 sqm of F&B outlets** — one integrated renovation spanning three very different use cases under one roof.
- Managed contractor negotiations, competitive bidding, and payment certification through to project closeout.
- Executed and handed over the project in **120 days**, fully on schedule against plan, with the final account closed under budget.

►► **PORTFOLIO-WIDE FM**

NATIONAL AGRICULTURAL DEVELOPMENT CO. (NADEC)

Riyadh, Saudi Arabia

Senior Facility Manager

- Held full accountability for engineering and facilities operations across a **42-site portfolio**, including 38 distribution centers, with a combined annual **OPEX budget of SR 50M+** and **CAPEX budget of SR 15M+**.
- Managed maintenance, security, catering, and cleaning/hygiene functions through external contractors, vendors, and service providers.
- Directed development of a centralized in-house maintenance application unifying tracking, monitoring, and operational controls across all four functions.
- Consolidated preventive maintenance for HVAC, refrigeration, and firefighting systems across the Saudi distribution center network under single service providers, improving service levels, quality, response times, and emergency breakdown recovery, and lifting scheduled PM completion to **100% on time**.
- Secured regulatory approvals and maintained compliance with Civil Defense, Municipality, SFDA, and MOI requirements across five main distribution centers in Riyadh, Jeddah, Dammam, Qassim, and Abha, leading commissioning, testing, and technical audits through to site handover.

►► FIT-OUT DELIVERY

GLOBAL OFFICE SOLUTIONS

Riyadh, Saudi Arabia

Project Manager, Fit-Out

- Across nearly four years, led a **23-person multidisciplinary delivery team** spanning interior, electrical, and mechanical design, project coordination, site supervision, and installation, reporting directly to the COO.
- Ran multiple corporate fit-out sites simultaneously, managing client, consultant, and subcontractor interfaces and reviewing multidisciplinary coordination drawings in AutoCAD.
- Prepared and monitored schedules, certified payment certificates and variation orders, and ensured compliance with Saudi Building Codes.

►► LANDMARK PROJECT · KAPSARC

DRAKE & SCULL INTERNATIONAL

Construction Saudi Arabia · Riyadh

Senior Site Engineer, Facade

- Delivered the **22,000 sqm facade structure** for the Conference Center on Saudi Aramco's **SR 2.5 Billion KAPSARC** (King Abdullah Petroleum Studies and Research Center) project, one of the Kingdom's landmark research campuses.
- Led a site workforce of close to 500 installers through supervisors and foremen, with minimal senior oversight.
- The project that took my career from quality assurance into hands-on site engineering leadership.

►► WHAT I BRING

SKILLS & EXPERTISE

- Facilities & Engineering Leadership

- Capital Project & Fit-Out Delivery

- MEP / HVAC & Fire-Life-Safety Systems

- Budget, Cost & Contract Management

- Regulatory & HSE Compliance

- Client & Stakeholder Relationship Management

- Multi-Site Operations Management

- Preventive & Corrective Maintenance

- CAFM / Maintenance Systems Design

- Contractor & Vendor Negotiation

- Team Leadership & Development

- Risk Management & Reporting

TOOLS & TECHNICAL PROFICIENCY

- AutoCAD

- MS Office (Excel, PowerPoint, Project)

- Primavera / MS Project

- SAP

- CAFM / Maintenance Ticketing Systems

- KPI & Reporting Dashboards

BUILDING & MEP SYSTEMS EXPERIENCE

- Firefighting Systems

- Refrigeration Systems

- CCTV Systems

- LV Systems

- A/V Systems (Audio/Video)

- Backup Generators

- Fire Alarm Systems

- HVAC Systems

- Security Systems (Turnstiles & Barrier Gates)

- Low Current Systems

- VRF Systems

- Cold Rooms

- Civil Works

- Plumbing Systems

- Joinery

SYSTEMS & APPLICATIONS BUILT

DUKAN MAINTENANCE WEB PORTAL

DUKAN RETAILING COMPANY • 2025

Designed, built, tested, and deployed a custom CAFM platform myself using AI-assisted development, despite having no formal coding background, from workflow design through user-adoption training, enabling store teams across 170+ sites to log, track, and close maintenance requests digitally in place of manual, phone-based reporting.
